

Beyond The Database

The RESTful API

Problem Statement

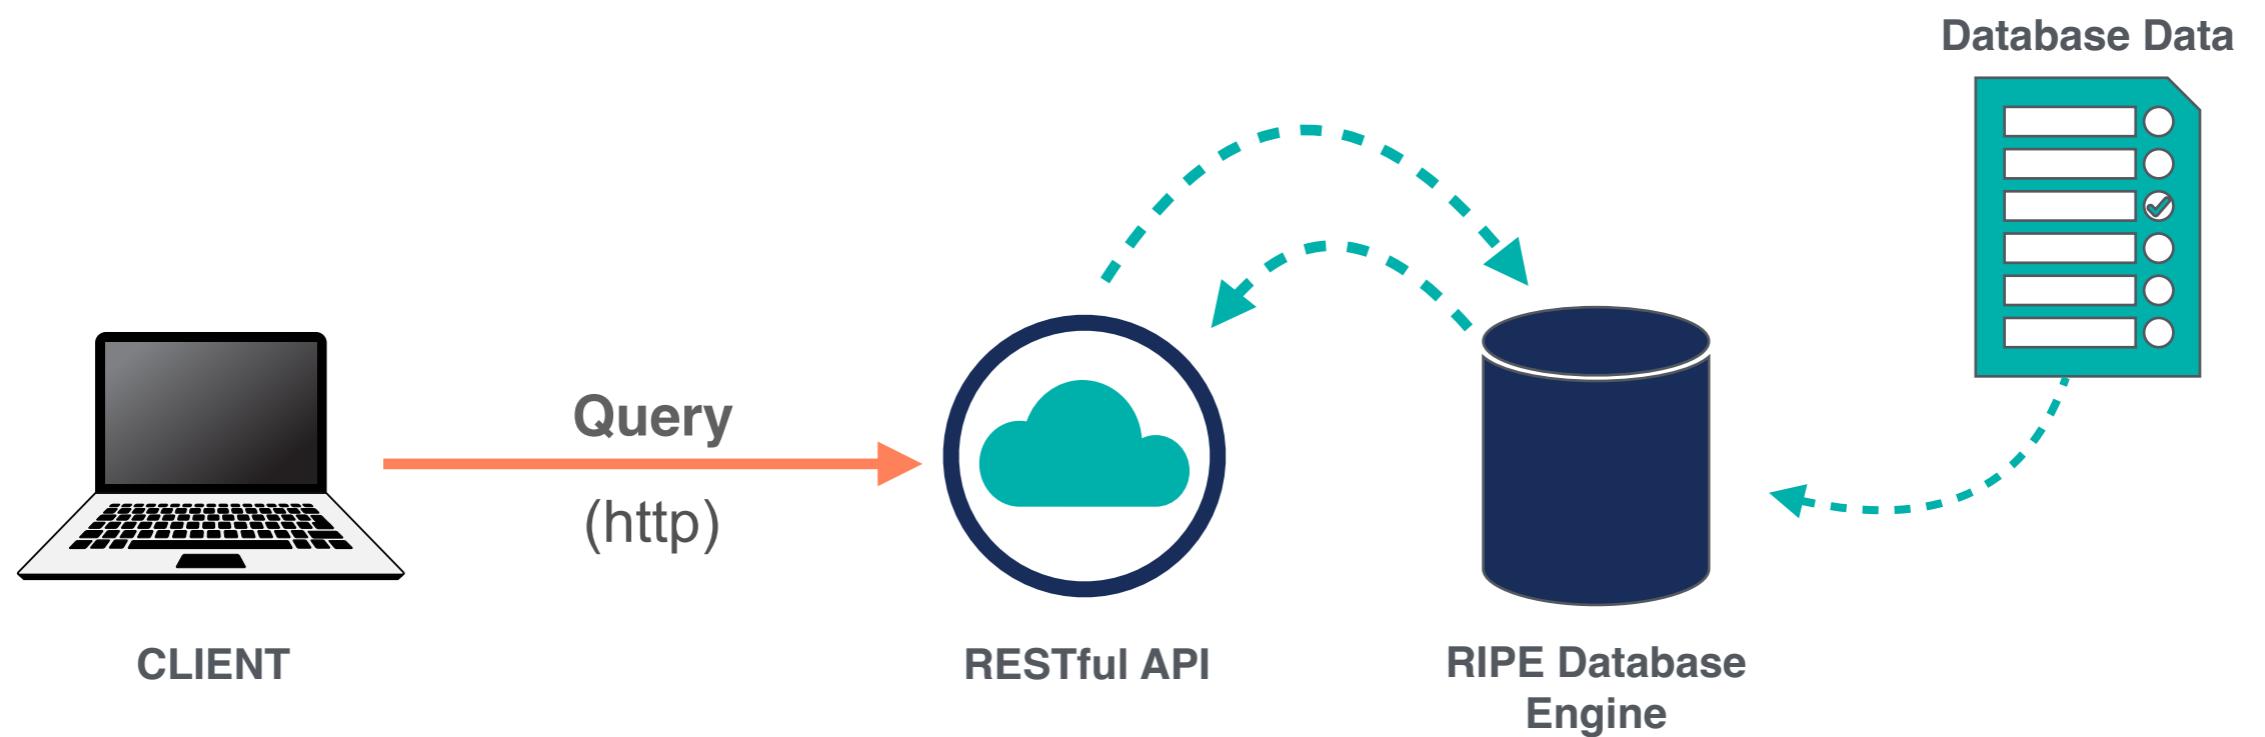

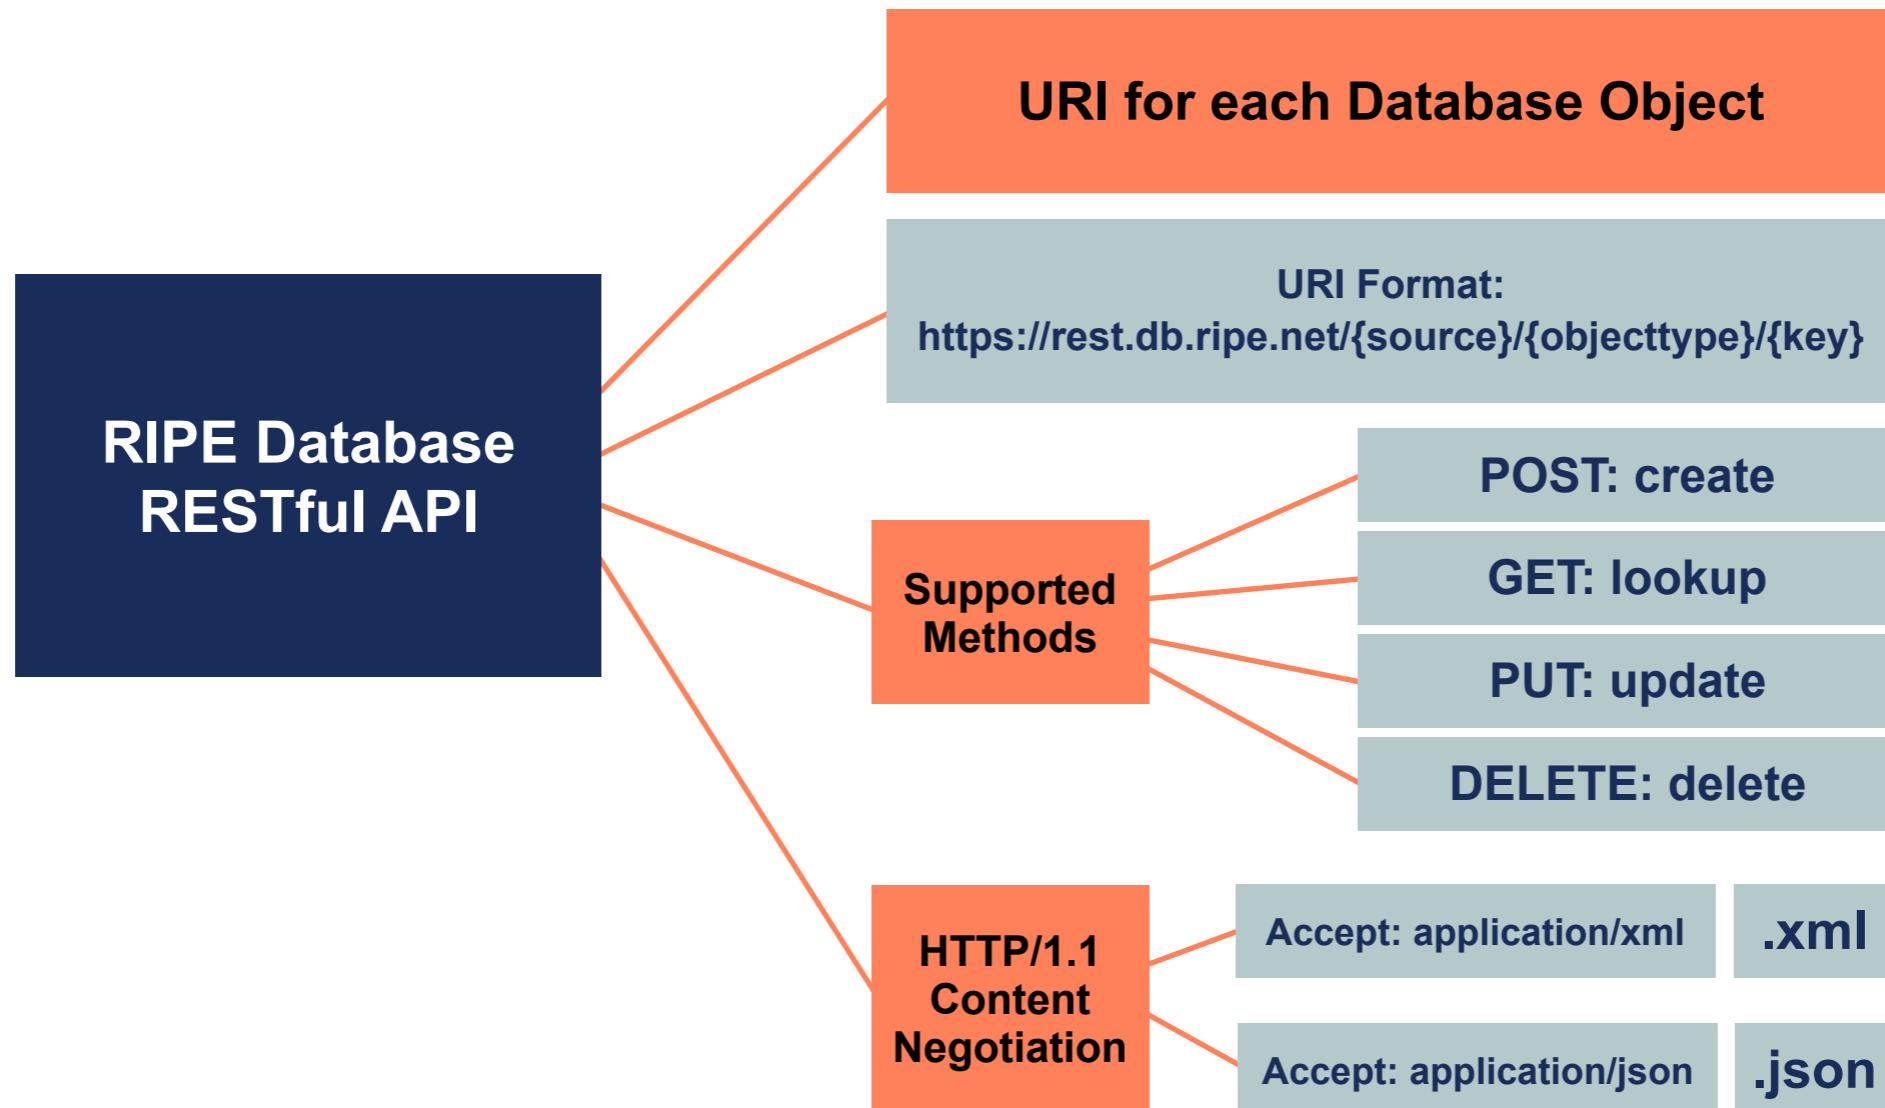

- Your company has a provisioning software that **assigns** address blocks to customers from a pool
- The RIPE policies require you to **register** these blocks with contact data in the RIPE Database
- Can you **save time** by letting the software create the required objects in the RIPE Database?

RIPE Database RESTful API

- Allows **REST-compliant** systems to access the RIPE Database
- Data is exchanged in **XML** or **JSON** format
- Standard **query limits** apply

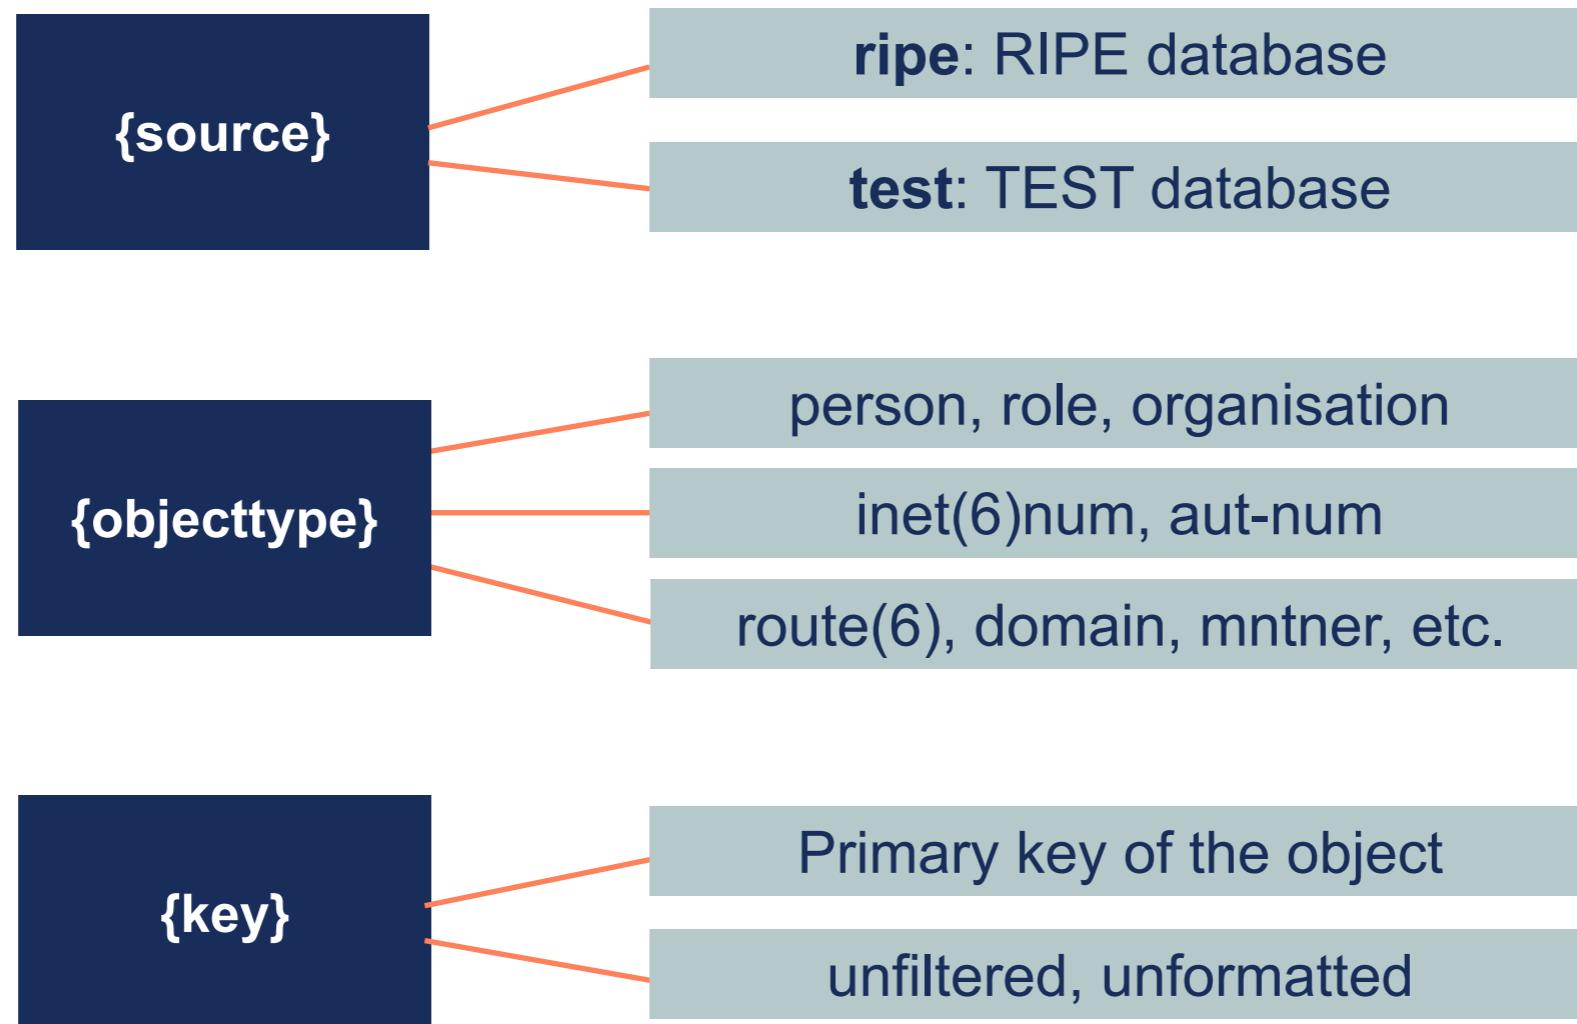

Environments

Environment	Protocol	Client cert	Endpoint
TEST	HTTP	No	http://rest-test.db.ripe.net
TEST	HTTPS	No	https://rest-test.db.ripe.net
TEST	HTTPS	Yes	https://rest-cert-test.db.ripe.net
RIPE	HTTP	No	http://rest.db.ripe.net
RIPE	HTTPS	No	https://rest.db.ripe.net
RIPE	HTTPS	Yes	https://rest-cert.db.ripe.net

URI Format:

`https://rest.db.ripe.net/{source}/{objecttype}/{key}`

HTTP Status Codes

Bad Request (400)	The service is unable to understand and process the request.
Forbidden (403)	Query limit exceeded.
Not Found (404)	No results were found (on a search request), or object specified in URI does not exist.
Conflict (409)	Integrity constraint was violated (e.g. when creating, object already exists).
Internal Server Error (500)	The server encountered an unexpected condition which prevented it from fulfilling the request.

Method: GET

Updating Objects - Without MD5

Send the content of "file.json" using the PUT method

\$ curl -v --header "Content-type: application/json"

-d @file.json -X PUT

Use "client-key.pem" file for authentication

--key client-key.pem

Use "client-cert.pem" file for client certificate verification

--cert client-cert.pem

https://rest-cert.db.ripe.net/ripe/person/XY12345-RIPE.json

Sends the request with a header specifying the data format as JSON

Specifies the REST API endpoint to interact with

* **MD5 authentication will be deprecated in 2025**

Help To Shape Our Services

- Get involved in discussions - on mailing lists, forum, at meetings, etc.
- Give feedback on services or activities, even if that's just a “carry on as you are”, an “I don't like this” or a “+1”
- Register for a RIPE Meeting - if you haven't done it before, register for free as an online attendee and join the sessions that look interesting
- Vote at the RIPE NCC General Meeting and see what's involved - even if the next one isn't interesting for you, it's good to see what's involved and how it impacts you
- Not all discussions are about policy or governance - suggest improvements to tools like RIPE Atlas, the LIR Portal, the **RIPE Database** etc. to help the RIPE NCC understand what's important for you so we prioritise correctly

Let us know what you miss!

- Various mailing lists covering all activities and services (including RIPE Database!)
- RIPE community pages
- RIPE Meetings
- Regional Meetings and other events
- RIPE NCC General Meeting
- Training Courses and Webinars
- RIPE NCC Forum
- RIPE Labs
- All the usual social media platforms
- We come to NOG/IXP meetings and other events
- Everything is geared for remote participation!

Languages

- We now have content on [www.ripe.net](https://www.ripe.net/languages/es/) in Spanish
